Project Overview

Introduction and Background

In July 2022 the Downer Group approached Council to host temporary workers' accommodation on land under the care, control and management of Council as part of its construction of the Project Energy Connect.

A lease agreement between Council and Downer Utilities Australia Pty Ltd was entered into commencing 1 November 2022 and expiring on 30 April 2024 for the land at Lot 7 North West Terrace, Morgan.

At the time of the announcement of the lease, it was the intention that a portion of the proceeds from the lease would be invested into the Morgan community, following community consultation.

At the Council meeting held on 18 March 2025, Council allocated a total amount of \$100,000 over two budget periods (2025/26 and 2026/27) for project/s within the Morgan area and community consultation be undertaken to identify suitable project/s for Council's consideration.

Following community consultation and feedback, several potential projects were shortlisted by Council for costing. These projects were then evaluated and ranked in order of preference by Council at an Elected Member briefing session, for further consideration by Council.

A report was presented at the November 2025 meeting providing Council with project details and estimated costings and Council Administration's assessment of the projects to enable priority projects to be identified as part of the next stage of community consultation with the Morgan and surrounding community.

About Our Engagement

The purpose of this report is to outline the engagement activities undertaken by Council.

These activities were designed to assess the community's preferences with regards to the six (6) shortlisted projects that were identified as potential projects by the Morgan Community.

What we wanted (Engagement Objectives)

The public engagement program had one objective:

1. To seek the communities feedback and preferences in regard to the six (6) shortlisted projects.

What we did (Engagement Activity)

Communication

Consultation was conducted over a 21-day period from Wednesday 3 December 2025 to 5.00pm Tuesday 23 December 2025.

Council promoted the engagement through social media, website and direct email to community and sporting groups located in Morgan and surrounds. Facebook posts were scheduled throughout the consultation period and published on 3 December and 18 December 2025.

Members of the community were invited to provide their feedback via the Mid Murray Your Say feedback form to rank their preferences from 1 (highest) to 6 (lowest).

Engagement Response

Response rate

Council received 57 responses to the online survey.

What We Heard - Findings and Results

Participants of the survey were asked to rank their preferences of the shortlisted projects from 1 (representing their highest priority) to 6 (representing their lowest priority).

Below is a summary table of the project rankings:

Ranking	Skate park/ pump track	Pendles Tearooms upgrade	PS Canally restoration works	Town signage review and upgrade	Dog park	Toilets at the Morgan Institute
1	20	6	2	9	7	9
2	10	5	5	12	9	9
3	5	5	10	10	8	8
4	5	17	10	3	4	8
5	9	5	12	8	8	5
6	2	9	10	5	12	9

Table 1: Number of responses received for each project according to ranking applied

To establish a clear ranking of the shortlisted projects following the community consultation, a points-based system was implemented as per the below table:

Ranking	Points
1	6
2	5
3	4
4	3
5	2
6	1

Table 2: Points system applied to project rankings

The overall project rankings using this assessment calculation are outlined in the table below:

Project Ranking	Points
Skate Park/Pump Track	225
Town Signage	184
Toilets at the Institute	174
Dog Park	159
Pendles Tearooms	151
PS Canally	141

Table 3: Overall project rankings based on points system

A full list of the responses received through the community consultation is attached at Appendix A, with a summary of comments from respondents who provided further feedback below:

Skate Park/Pump Track

- A number of respondents commented that there is little in the way of physical activities available for the youth of the town and a facility like a skate park/pump track would be beneficial to the community.

Dog Park

- Several respondents commented that off leash dogs are a concern in the town at the moment and having a safe place for owners to take their dogs to exercise them safely would be a benefit to the community and visitors to the town.

Toilets at the Morgan Institute

- Some respondents are in favour of the funds being allocated to the toilet in the Morgan Institute while others were opposed due to the current application from the Morgan Lions Club to utilise this location for their Op Shop.

Pendles Tearooms upgrade

- Responses have been received both in favour and against the funds being used for the Pendles Tearooms upgrade. Whilst some have indicated the site has great potential others have voiced their opinion that these works should be funded by Council's own budget.

Town Signage

- Support for a review and upgrade of town signage both at the edge of town and within the town itself to promote and connect Morgan's assets.

Alternate projects

- One respondent indicated that the Morgan Wharf would be a suitable project for the funds to be allocated to for continued restoration of the facility.
- Another respondent stated they would rather the roads in the area be upgraded, with another stating the footpaths require attention.

Conclusion

Community engagement is seen as a critical input to the decision-making process by Council for selecting suitable project/s for Morgan to expend the budgeted amount of \$100,000 over two financial years on projects for Morgan and the surrounding area.

It is noted that the community engagement input is useful as an indicator of types of perception in our community but should not be considered representative of the whole population.

Feedback from the community consultation has indicated that the Morgan and surrounding community has differing ideas and priorities on what project/s should be progressed. There is no one clear project that the whole community would like to be progressed.

Next Steps

The information and data that has been collated from the second community consultation phase of the Morgan Community Projects will be presented to the January Council meeting along with this What We Heard Report for consideration of suitable project/s. Selected projects will then be costed for further consideration by Council.

This What We Heard Report will be made available on Council's Website to close the loop on the Morgan Community Projects consultation.

I found the voting system a little difficult. For the life of me I can't understand any benefit of spending more money on Pendles Tea Rooms. have not heard of these plans at all.
The Canally cost should be councils budget problem and grant funding should continue to be used.
I am unable to see any income proposition as regards income from the Skate park.
It is my opinion that the funding being made available is not sufficient to assist with any of these suggestions apart from signage.

Children need a place to enjoy and be safe and the tourists would use this alot of families come here and spend money in the town give them something else to do her. Dogs are a major issue ATM we have dogs that we don't walk because it's unsafe for them we need somewhere safe for them to go run around.

A fully enclosed double dog park similar to the one in Burra would be used by both locals and visitors/ tourists. Having two sections means those with little dogs can feel comfortable going in if someone else has a large dog in the other side. I've seen these doubles in many places now. It would be a wonderful and useful addition to our town.

Pendles upgrade will be a great asset to coincide with the boat running.
Having travelled extensively in Australia, the town entrances/signs are usually a great indication of what the town has to offer we have found.

I'd rather the roads were upgraded first. But of those options, a dog park/skate park would be most beneficial to residents. The town isn't just for tourists.

I think Pendles upgrade , Town signage and the PS Canally works should be done with Council and Tourism Funding. The Council makes money from these projects. Every town has a dog park now so I think this project will be a asset for the community and tourists.
The old bmx track has no shade and seating for parents .Parents say it's not suitable for young kids .

I attended the original meeting and felt there was very little support for the Pendles Tearoom upgrade, mainly because attendees were unclear on how the new space would actually be used. While I fully support the redevelopment of the Morgan riverfront and wharf precinct, I shared the concerns raised by the other attendees. We have a massive problem with signage, not just at the edge of town carparks but in the town centre as well. Too many people stop at the toilet block by the council office and then leave, never realising the river is right there. Connecting these areas with better signage would be a huge improvement.

Local business signs & maps at the 3 rest stops and also near the pharmacy.
The MMC should not be earning money from the community (Downer) funds, therefore the upgrading of pendles will potentially give an avenue for the MMC to lease this out and earn a income. The Upgrading of pendles will also effect 5 current businesses in town. Why not support current business instead of potentially driving them out of business.

Kids have no sport, no updated play ground and nothing to do in town. If kids have nothing to do then things like graffiti and property damage happens. Drive around town and look at the evidence. Tea rooms is not going to help the town of Morgan at all, canaly has already received plenty of funding and there are already signs coming into every direction of town. Kids about to get a social media ban, give them something else to do ☹☹☹

My primary focus is always only on the Township /Community of Palmer so this is "not my business". However may I suggest that the Body Politic should more clearly state the the accual amount being allocated from the Downer / Morgan Shared Community Funds which if I recall correctly was eventually(after a division and considerable discussion about the ethics) \$50k, per year over two years with the other \$50k being retained by MMC because the Body Politic believed that the MMC had a right to retrospectively include funding previously provided to the Morgan Community.
Shared Community Benefits is everyones business.
BTW Nice job to all on the upgrade of the Monkey Surveys and an excellent job on the improved access for feed back and Getting in Contact. Thank you all.

Subject: Regarding Project Prioritization and Adherence to Fairness Criteria

I am writing to express my profound concern and disappointment regarding the outcome and prioritization of projects discussed at recent meetings. As an active participant in all previous discussions, I believe there has been a significant and unfair deviation from the principles established for project viability. Throughout the initial review phase, the consensus was clear: any proposal that primarily served the betterment of a single club or organization, or was deemed an inefficient use of public funds due to limited community return, was rightly removed from the list of priorities. The only projects that achieved unanimous agreement and demonstrated clear, wide-ranging benefit to the entire community were those centered on enhancing Morgan and boosting local tourism. These include the crucial Signage Review and Upgrade and improvements to the Historic Walk, Pendles Tearooms upgrade, PS Canally restoration works. These initiatives must remain the primary focus, as they benefit the largest cross-section of residents and visitors. I must, however, specifically query the re-inclusion and current advocacy for the replacement of the Institute toilets. This project was explicitly and appropriately removed from the list some time ago, precisely because it failed the fairness test—it was determined to be a significant expenditure benefiting one specific facility and, by extension, primarily one club, while many other clubs were receiving no support. Frankly, this apparent reversal is deeply troubling. Given that the Secretary is also acting as the Chairperson for the Lions Club, which operates from that specific facility, there is an undeniable perception of a conflict of interest driving the renewed prioritization of this expenditure, overriding the previously agreed-upon criteria for fairness and community-wide benefit. I urge the Committee to revert to the established principles of resource allocation that were applied to all other submissions. Funds must be directed toward projects that benefit the community as a whole, such as the agreed-upon tourism and signage initiatives for Morgan, etc.

Sincerely,

the dog park idea was put in there so we could get more doggy poop bag dispensers and bins at the school oval and other lawn areas in the town

I believe, given the number of dogs wandering around Morgan at present, that a dog park would be a great way for owners to reconnect with their dogs and take more responsibility for ensuring their dogs are properly exercised - in a safe manner. This will also be enticing for visitors passing through town and a great reason for them to stop and maybe spend some money in our town while they exercise their dog - near the bakery would be fantastic! Equally important is some additional facilities for the young people of Morgan (and visitors) to have somewhere safe to get their exercise. I do not think that the toilets at the Morgan Institute should be a priority at all as there are facilities just around the corner next to the Pharmacy - for the amount of times this facility is used I'm sure those toilets would be adequate.
